

Logo Guidelines for Dye Sublimated Fishing Jerseys:

**** Please submit your form first so we can tell you which logos we already have and which ones we need**

File must be one of the following:

- 1) Vector file preferred (a true vector file is an art file that has moveable parts and pieces.
.eps and .ai are vector files
Sometimes a pdf is a vector file as well
** some online sites say they can convert JPG to vector. If this were true, we would be doing this instead of paying an artist. :)**
 - 2) High Res PNG file with a transparent background
Can many times be used just fine!**
- If you cannot provide the proper file, the only other option is for an artist to recreate it into vector format. Our artist that we use charges roughly \$12-20 per logo depending on the complexity of the design.**
